

The Mini Series

Package Pump Station

Product Overview

The Mini Range of package pump stations are designed to collect foul water from an entire property or other buildings which houses multiple people such as commercial offices and other light commercial applications.

The Mini Range has been designed to ensure an easy and trouble free installation and is manufactured in high grade HDPE. The Mini Range of pump stations are delivered to site as a complete package, including all internal pipe work and a sewage pump.

This system also comes with guide rail and pedestal kit for easy pump access. The station is designed to pump through a 63mm pump main as the chamber's outlet terminates in a 2" male BSP thread.

The Mini Range of package pump stations allow for one or two 110mm inlet (to be drilled on site) to enable a quick and easy installation.

We would strongly recommend that a high level alarm is fitted to warn of any issues should they arise. For detailed instructions for wiring and installation, please review the installation manual.

Application Areas

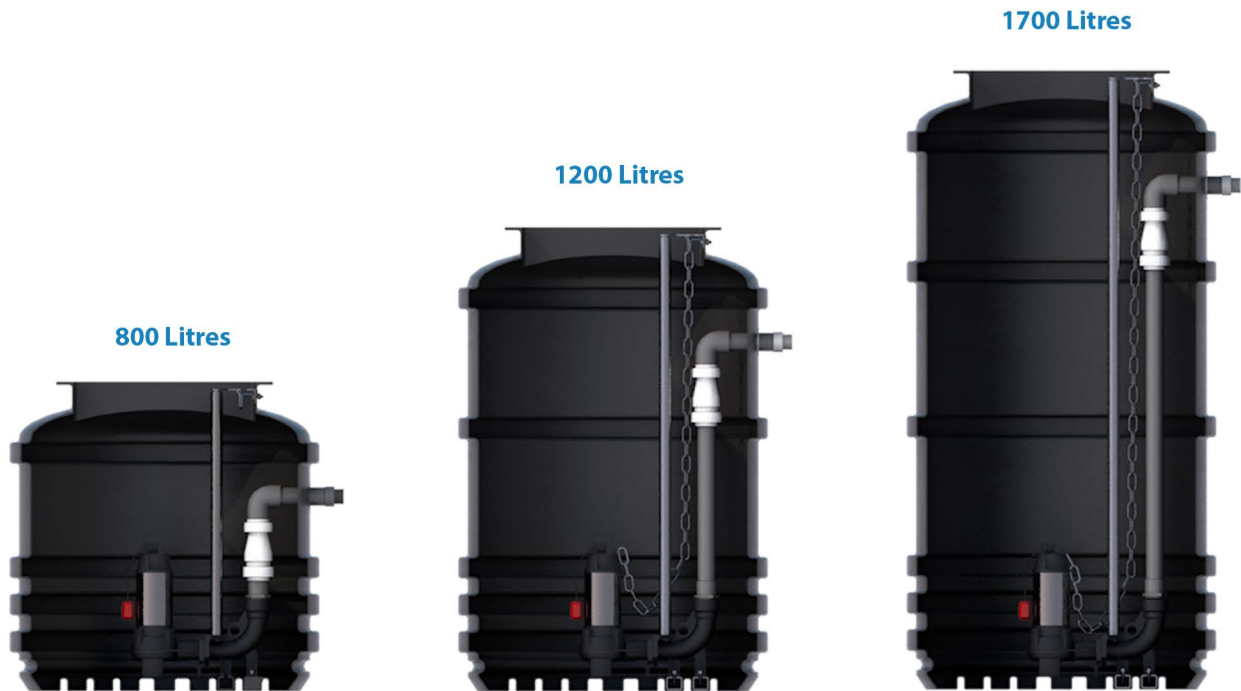

The Mini Series is suited to multiple types of application, the most common being: -

- ▶ Residential extensions
- ▶ Basement Conversions
- ▶ Workshops
- ▶ Outbuildings
- ▶ Annexes

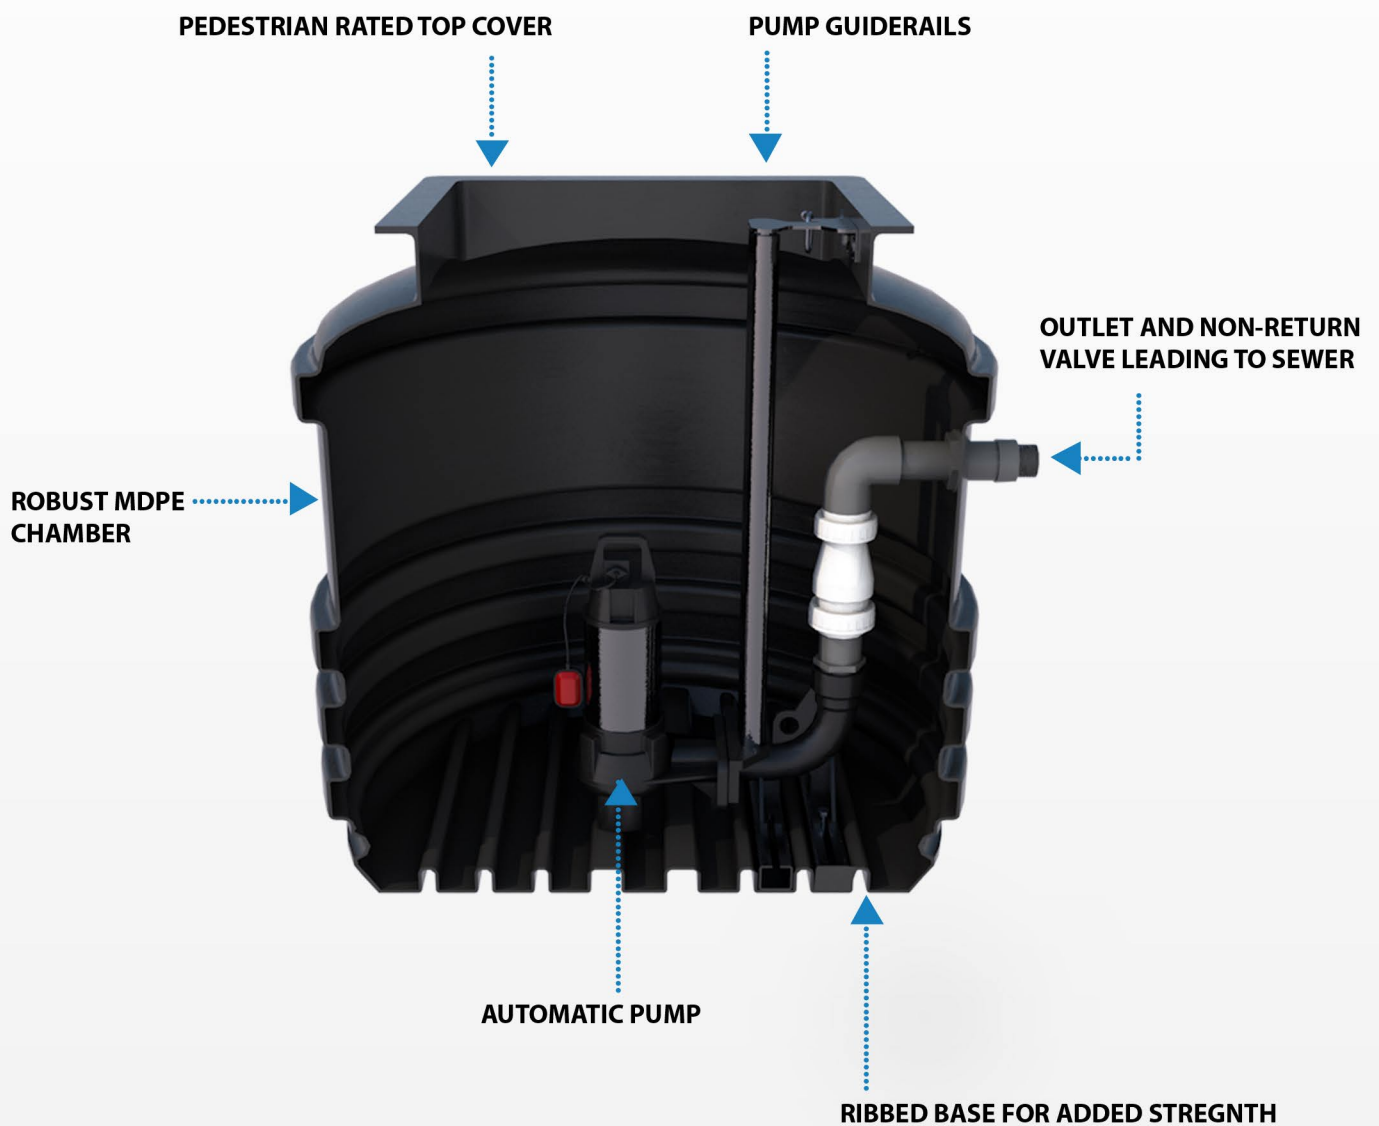

Additional Extra Components

The Micro Series can also come with a range of extras and accessories which are recommended with each station, these are: -

- ▶ Pipework and fittings
- ▶ High level alarm
- ▶ Telemetry alerts
- ▶ Battery backup
